

# Corn Trial in Tennessee

*This trial was conducted to determine the effectiveness of Monty's Products for improving corn yield.*

In this 2018 corn trial conducted in Tennessee, the following product applications were applied according to the letters in the chart above:

A	Monty's Premium Blend 6-24-6 - 1 gallon + 2 quarts Calcium Plus
B	Monty's Premium Blend 6-24-6 - 1 gallon + 2 quarts Calcium Plus + 2 quarts Microhance + 1 pint BioStrain
C	Untreated Control - liquid nitrogen only

\*all listed product volumes were applied "per acre"

Monty's Plant Food Company conducts trials like this; testing our products to continually improve and to show that Monty's products are effective in the field. ***The highest Monty's plot in this study showed a 9.15 BPA increase over the control.***
