

Corn Trial in Towner County, ND

This trial was conducted to determine the effectiveness of Monty's Products for improving corn yield.

In this 2018 corn trial conducted in Towner County, ND, a control corn plot was compared to a Monty's Plot with 1 quart/A C795 and 1 pint/A Microhance applied at V5. The results were Monty's plot, 154 BPA; control plot, 150 BPA.

Monty's Plant Food Company conducts trials like this; field testing our products to demonstrate their efficacy. ***The Monty's plot in this study showed a 4 BPA increase over the control plot.***
