

Field Test Data

Foliar Soybean Treatments 2011, in association with the Maryland Soybean Board and Ron Mulford

This Trial was done in association with the Maryland Soybean Board and Ron Mulford. The trial was planted on June 21, 2011, the variety was Pioneer 94M50, and population was 133,294.

Each treatment had liquid fertilizer of 50 gal/A of 2-4-12 early preplant with burndown herbicide Gramoxone Inteon® plus Dual II Magnum®. This was planted No-Till behind No-Till Corn (the previous year's crop).
