

Humihance - Nitrogen Management

The purpose of this trial was to determine the effectiveness of Monty's Humihance for stabilizing key nutrients in the soil.

Real Farm Research, located in Aurora, NE conducted this study during the 2018 season. The plots were planted in corn, and the soil samples were taken from the respective plots when corn was at growth stage R3. The following products were applied accordingly:

Product:	Rate:	Nitrate lbs N/acre in Soil
Humihance	1 gallon/2000lbs. urea	57
Instinct HL	12 oz per acre	39
Agrotain Advanced 1.0	2 quarts/2000 lbs. urea	31
Nutrisphere	2 quarts/2000 lbs. urea	23
Untreated Control	N/A	14

Monty's Plant Food Company conducts trials like this; testing our products to prove that Monty's products are effective and the best in the industry. In this test, the **Monty's Humihance plot displayed a nitrate concentration of 57 lbs N/acre in the soil. This was 43 lbs N/acre higher than the untreated control, and the highest amount in the study.**
