

Humihance - Potassium Management

The purpose of this trial was to determine the effectiveness of Monty's Humihance for stabilizing key nutrients in the soil.

Real Farm Research, located in Aurora, NE conducted this study during the 2018 season. The plots were planted in corn, and the soil samples were taken from the respective plots when corn was at growth stage R3. The following products were applied accordingly:

| Product: | Rate: | Potassium ppm in Soil |
|-----------------------|------------------------|-----------------------|
| Humihance | 1 gallon/2000lbs. urea | 710 |
| Agrotain Advanced 1.0 | 2 quarts/2000lbs. urea | 573 |
| Nutrisphere | 2 quarts/2000lbs. urea | 534 |
| Instinct HL | 12 oz/acre | 493 |
| Untreated Control | N/A | 518 |

Monty's Plant Food Company conducts trials like this; testing our products to prove that Monty's products are effective and the best in the industry. In this test, the **Monty's Humihance plot displayed a potassium concentration of 710 ppm in the soil. This was 192 ppm higher than the untreated control concentration of 518 ppm.**
