

# NC State University Wheat Trials & Monty's

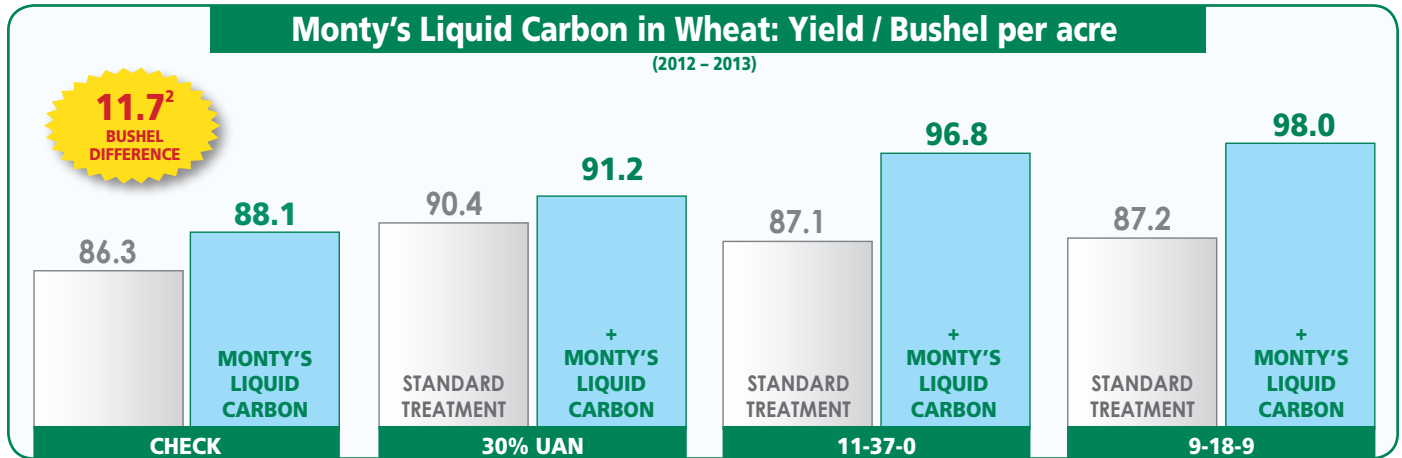

## The proof is in the field trial results!

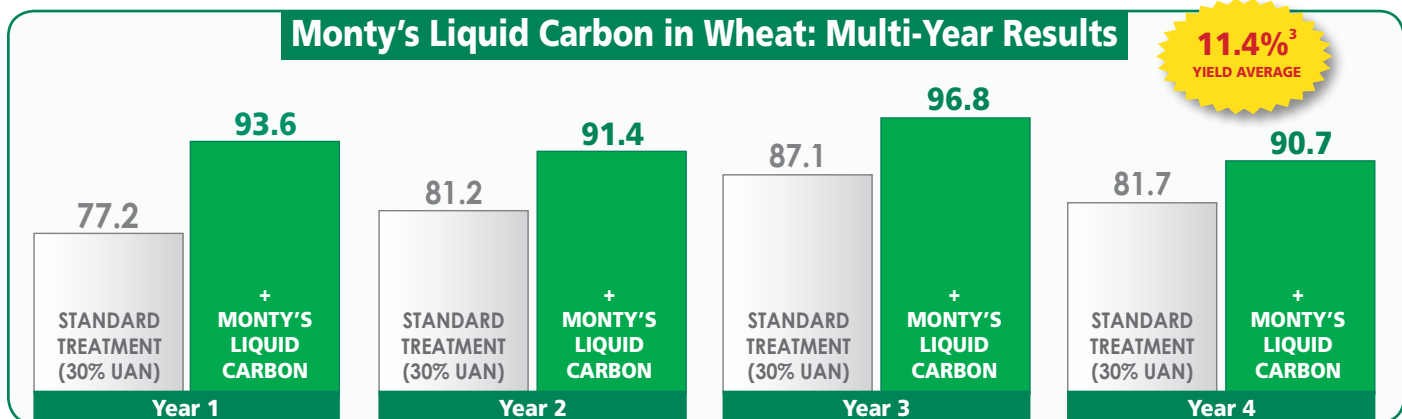

\$4 wheat can be profitable when using Monty's Liquid Carbon at planting and with Nitrogen applications. Trials below were conducted by NC State University. For more information about these trials, contact your Monty's representative.

<sup>1</sup> Percentage increase difference: Control (51.5) vs 9-18-9 application (70.1)

<sup>2</sup> Difference between the check (86.3) and the highest bushel yield (98.0).

<sup>3</sup> Indicates yield average increase all years, control vs MLC application. Study conducted from 2011 through 2015.
