

# Soybean Trial in Calhoun, KY

*This trial was conducted to determine the efficacy of a combination of Monty's products for increasing soybean yields as compared to a control plot.*

The following treatments were applied in a 2018 soybean trial conducted in Calhoun, KY:

Entry:	Treatment:	Moisture (%)	Yield (bushels/acre)
#1	Monty's plot: <b>First pass:</b> 3 gallons Premium Blend 6-24-6 + 2 quarts Microhance + 1 pint BioStrain + 1 quart AgriSweet <b>Second pass:</b> 2 quarts Agrihance V + 1 quart Microhance + 1 quart Sulfur 15 + 1 quart K28	10.9	74
#2	Untreated Control	10.8	60

\*all listed product volumes were applied "per acre"

Monty's Plant Food Company conducts trials like this; testing our products to find the highest yielding combinations for your crops. ***In this trial, the Monty's plot yielded 14 BPA above the control plot.***
