

1-2 PUNCH FOR HIGHER YIELD

Now is the time to add Agrihance®-V and Microhance™ to your spray program. Tank-mix with your fungicide and insecticide application today... for success you can see!

AGRIHANCE®-V

Agrihance-V is foliar-applied, during the plant's vegetative growth stage giving your crop the specific nutrients it needs from post-emergence to reproduction. The unique no-burn formula and tank-mix flexibility boosts performance without crop injury or making an extra pass through the field.

- Nutrient management program
- Provides key nutrients during vegetative stage
- Improves stress management
- Use with any pass through the field
- Helps maximize yield
- 6-11-5 analysis

MICROHANCE™

Microhance offers a unique blend of Monty's technology designed to provide nutrients to the plant at any stage of growth, helping maximize the plant's yield potential.

- Apply to any crop being grown
- Foliar apply at any stage of growth
- Great tank-mix flexibility with herbicides, insecticides or fungicides
- 6 nutrients used by the plant to enhance metabolism: (Nitrogen (N), Sulfur (S), Boron, Iron (Fe), Manganese (Mn), and Zinc (Zn))
- Apply during growing season to help reduce stress

MOST EFFECTIVE WHEN APPLIED DURING GROWTH STAGE: CORN V5 AND SOYBEANS R2

APPLICATION INSTRUCTIONS

Soybeans: During R2 stage, tank-mix one quart per acre of both Microhance and Agrihance-V with insecticides and herbicides.

Corn: During V5 stage, tank-mix one quart per acre of both Microhance and Agrihance-V with insecticides and herbicides.

Don't forget: when side dressing Liquid Nitrogen, add 1 quart of Monty's Liquid Carbon.

“ When applied together, these two products provide energy and nutrients to help take plants through the seasonal stresses that lie ahead – protecting yield potential. ”

Charlie Hubbard, Agronomist
