Plant Tissue Sampling

Grow – In the Know.

Simple, beneficial, and fast tissue sampling

As much as 30% of your crops' potential yield is lost due to nutrient deficiencies. The best way to detect these deficiencies is to have plant samples analyzed early in the growing season. A good plant sampling program allows the grower to correct these problems and help avoid yield loss. Monty's free Plant Tissue Sampling program is a quick and easy solution to get the recommendations and results growers need within 48 hours! This allows you to quickly and efficiently address issues that can negatively affect your yield!

Monty's Plant Tissue Sampling Program:

- Is a fast, easy, exacting solution for you, the grower!
- Maintains the confidentiality of your data
- Is coordinated directly with your trusted Monty's representative
- Offers the results including 11 nutrients, usually within 48 hours
- Provides recommendations to address any nutrient deficiencies

Soil Sampling Tool

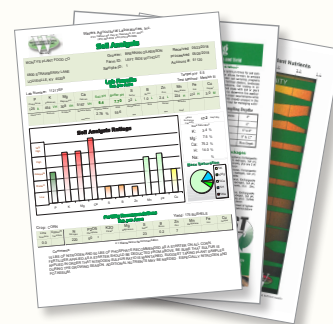

Know your soil.

Discover Your Soil's Productivity

Soil tests are essential to achieving high yields. Analyzing soil helps growers recognize the deficiencies in their soil, so they can quickly and efficiently address them. Soil tests establish a baseline of soil composition and a nutrient profile, giving growers an ideal assessment of their soil, and yield potential. Monty's free Soil Sampling Program is an effective tool to determine fertilizer needs, while also taking advantage of the nutrients already present in the soil.

Monty's Soil Sampling Tool:

- Is fast, easy... and free to you, the grower!
- Maintains the confidentiality of your data
- Is coordinated directly with your trusted Monty's representative
- Offers comprehensive results, usually within 48 hours
- Provides recommendations to address any nutrient deficiencies
