

SUCCESS YOU CAN SEE STARTS UNDER YOUR FEET

“TRY US ON YOUR MOST CHALLENGING FIELDS”

It's time to think about your spring planting! Monty's Plant Food Company offers products designed to improve the health of your soil for maximum yield and benefit to your crops. When added to an existing starter program, Monty's Liquid Carbon helps create the optimum environment during germination, emergence and early plant growth to get your crop off to its best start! Prepare your soils this spring for season-long benefits.

MONTY'S® LIQUID CARBON™ SUGGESTED APPLICATION RATES

- At preplant or burn down:
½ to 1 gallon per acre
- At planting in a 2 x 2 starter program:
½ gallon per acre
- Added to any liquid nitrogen application:
1-2 quarts per acre
- Added to any other foliar applied nutrient product:
1 quart per acre

Available in 2.5, 30, 275 gallon – and bulk sizes. Please check with your dealer or Monty's rep for availability and application rates or visit www.montysplantfood.com

“We used it on several thousand acres and we have seen excellent results in plant health, extra increase in bushels, and an excellent return on investment.”

Dale Brookins, Area Manager for Southern FS
