

MONTY'S® LIQUID CARBON™

Proprietary activated humic technology.

Monty's Liquid Carbon is a soil conditioner designed to reduce soil compaction and improve overall soil health. It can be easily applied all year round, especially during pre-chemical application or burn down. Liquid Carbon enhances micronutrient uptake and breakdown of plant residue. Improve the health and vitality of your soil and maximize your yields with Monty's Liquid Carbon (MLC).

- ✓ Reduces soil compaction
- ✓ Improves overall soil health
- ✓ Easy application during burn down
- ✓ Enhances micronutrient uptake
- ✓ Enhances breakdown of plant residue
- ✓ Tank-mix flexibility for year-round use
- ✓ OMRI listed for use in organic production

Available in 2.5, 30, 275 gallon – and bulk sizes.

Active Ingredients:

Organic Carbon	1%
Humic Acids	2%

Derived From: Brown Coal

GENERAL APPLICATION

Apply at varying rates depending on purpose or desired result. For general soil conditioning, apply 2 quarts per acre directly to soil in fall and early spring.

May also be applied at the same rate at pre-plant, planting, or for residue management. Apply 1 quart per acre when foliar applying with liquid nitrogen or other fertility products.

Monty's Liquid Carbon is OMRI-listed and approved for organic application.

“ We farm about 650 acres of corn, soybeans, wheat, and pasture. We use Monty's Liquid Carbon on our corn to reduce compaction and break down residue. It has given us higher yields and better soil health. Monty's products mix well, are cleaner, and are better products. Monty's has been a great return on our investment. ”

Coley Rogers, Farmer
