

PRODUCT TECH SHEET

NAUXIN™

Product description:

Monty's Nauxin offers a unique blend of Monty's technology that is approved for use with dicamba herbicide applications. It is designed to provide nutrients to the plant at any stage of growth, helping maximize the plants yield potential. Nauxin is recommended for the prevention and correction of micronutrient deficiencies in all crops.

Application benefits

- Foliar apply to any crop, at any stage of growth
- Nutrients used by the plant to enhance metabolism
- Nitrogen to enhance growth and green-up
- Apply during growing season to help prevent stress
- Tank-mix flexibility with insecticides, fungicides, and herbicides, including Engenia®, Enlist™ and XtendiMax®

Active ingredients

Total Nitrogen (N)	3%
3% Urea Nitrogen	
Soluble Potash (K ₂ O ₅) (<i>Potassium Acetate</i>)	4%
Sulfur (S) (<i>Potassium Thiosulfate</i>)	1%
1% Combined Sulfur	
Boron (B) (<i>Boric Acid</i>)	0.25%
0.25% Water Soluble Boron	
Iron (Fe) (<i>EDDHA</i>)	0.25%
0.25% Chelated Iron	
Manganese (Mn) (<i>EDTA</i>)	0.25%
0.25% Chelated Manganese	
Zinc (Zn) (<i>EDTA</i>)	0.25%
0.25% Chelated Zinc	

Contains Non-Plant Food Ingredients

Glucose	6.5%
---------------	------

Directions for use

- Can be used in-furrow, foliar, 2x2, and y-drop.
- Monty's Nauxin may be applied in water, liquid fertilizers and suspensions, or with most herbicides and pesticides. Application rates and dilution factors depend on crop sensitivity, the amount of foliage to be sprayed and the application method. Monty's recommends first taking a soil test or plant tissue test, and having a qualified lab analyze the samples to determine micronutrient levels in your soil or plant, then follow recommended applications. Application guidelines for one growing season in the absence of a soil test or plant tissue test: 1-2 quarts per acre.
- Best if used with other Monty's products including starters, foliars, micronutrients, and biologicals. Ask your representative about specialized programs.
- See label for more detailed information.

Physical and chemical properties:

pH: 5.5 | Specific gravity H₂O=1: 1.319

Monty's products are recommended as supplements to your current farming practices and are not recommended to replace the nutrients typically added to the soil. We suggest taking a soil and/or tissue test, have a qualified independent lab analyze the samples to determine nutrient levels in your soils and plants, and then follow the recommendations of a qualified CCA, agronomist or dealer.

These micronutrients are intended only for the prevention and correction of boron and manganese deficiencies. Overuse on the intended crop, or under conditions other than those recommended, may result in serious injury to the crop. We recommend use only in accordance with the recommendations of a qualified CCA, agronomist or dealer.

When tank mixing any Monty's product with other farm chemicals, always read and follow the label directions of the chemical(s) you are considering and administer a jar test and/or a strip test before adding Monty's to your tank mix. When mixing with other farm chemicals, tank mix Monty's only after diluting the chemical according to label directions. Knowing the chemical's "mode of action" (block photosynthesis) or metal content (copper based) will help determine the compatibility of Monty's.

FOR COMMERCIAL USE ONLY. KEEP OUT OF REACH OF CHILDREN. HARMFUL IF SWALLOWED. AVOID CONTACT WITH SKIN, EYES, OR CLOTHING.

Information regarding the contents and levels of metals in this product is available on the Internet at: <http://www.aapfco.org/metals.html>
