

INTRODUCING CATALYZER™

**Top Growers' Humic of
Choice for Higher ROI**

**Lower Total
Costs Mean
Higher ROI**

Looking for a solution to help improve the health of your soil and plants while increasing your ROI this season? Monty's Catalyzer contains our industry-leading proprietary humic technology and is designed to lower your total cost while achieving industry-leading results.

Catalyzer's unique concentrated humic substances can:

- Reduce soil compaction
- Improve overall soil health
- Enhance micronutrient uptake
- Enhance breakdown of plant residue
- Be applied during burn down
- Be tank-mixed for year-round use

And because it's concentrated, it will help lower application, storage, and transportation costs. It will help reduce freight costs, tank space, and lead to fewer trips to the nurse tank... all saving you time and fuel... increasing your ROI!

Ask a Monty's representative how Catalyzer can improve the health and vitality of your soil, and maximize your yields. Healthy soil... healthy plants... higher ROI!

Active Ingredients:

Humic Acids4%
Fulvic Acid 0.7%

Derived from Lignite

Application Rates:

GENERAL: Apply at varying rates depending on purpose or desired result. For general soil conditioning, apply 1 quart per acre directly to soil in fall and early spring. May also be applied at the same rate at pre-plant, planting, or for residue management. Apply 1 pint per acre when foliar applying with liquid nitrogen or other fertility products. **HIGH YIELD:** Apply in-furrow, 2x2, or Y-drop at a rate of 2-4 quarts per acre directly to soil in fall and early spring. Monty's high yield program can vary for crops, application rates and timing. If you are interested in a high yield program, contact your Monty's representative.
