

# PRODUCT TECH SHEET DRIVAS™

## Product description

Drivas is designed for use with liquid fertilizers to facilitate nutrient uptake through the plant tissues.

## Application benefits

- Features Monty's proprietary fulvics
- Pure fulvics means more nutrient driving power
- Designed to significantly enhance nutrient uptake into the plant
- Works as a chelator for nutrients, thus increasing the nutrient's bioavailability
- Supports plant growth and flowering
- Amber color won't discolor your mixture
- Foliar apply with liquid nutrients
- Foliar apply with herbicides, fungicides, and insecticides
- Tank-mix flexible regardless of pH

## Active Ingredients

Fulvic Acids . . . . . 0.7%  
*Derived from Lignite*

*Monty's uses only the HPTA® Method for determining our humic and fulvic acids levels (ISO 19822). Other manufacturers may use less reliable methods. Ask your Monty's representative for more information.*

## Application Rates

GENERAL: Foliar apply at a rate of 1-2 quarts per acre. Drivas may be mixed with any grade of liquid fertilizer. Consult your local dealer for recommended rates for your particular region, soil type, fertilizer type and grade, and specific usage.

HIGH YIELD: Apply in-furrow, 2x2, or Y-drop at a rate of 1-2 gallons per acre. Monty's high yield program can vary for crops, application rates and timing. If you are interested in a high yield program, contact your Monty's representative.

- Best if used with other Monty's products including starters, foliar, micronutrients, and biologicals. Ask your representative about specialized programs.
- See label for more detailed information.

## Physical and chemical properties

pH: 3.5-4.5 | Water solubility: 100%  
Density: 1.01 | Boiling point: 212°F

Monty's products are recommended as supplements to your current farming practices and are not recommended to replace the nutrients typically added to the soil. We suggest taking a soil and/or tissue test, have a qualified independent lab analyze the samples to determine nutrient levels in your soils and plants, and then follow the recommendations of a qualified CCA, agronomist or dealer.

When tank mixing any Monty's product with other farm chemicals, always read and follow the label directions of the chemical(s) you are considering and administer a jar test and/or a strip test before adding Monty's to your tank mix. When mixing with other farm chemicals, tank mix Monty's only after diluting the chemical according to label directions. Knowing the chemical's "mode of action" (block photosynthesis) or metal content (copper based) will help determine the compatibility of Monty's.

FOR COMMERCIAL USE ONLY. KEEP OUT OF REACH OF CHILDREN. HARMFUL IF SWALLOWED. AVOID CONTACT WITH SKIN, EYES, OR CLOTHING.

*Information regarding the contents and levels of metals in this product is available on the Internet at: <http://www.aapfco.org/metals.html>*
