

INCREASE YOUR FUNGICIDE'S ROI

FEED YOUR CROPS. MAXIMIZE YOUR YIELDS.

During July and August, growers around the country will be making one to two fungicide passes. While making your fungicide pass, add a combination of Microhance, K28, Agri-Sweet FG, and Surge XD, to feed your crops.

Why should you apply these products?

You will be pushing your yields higher and protecting your yield potential. Each product will push your yield and produce specific results for your crops. Monty's is easy to tank-mix with your fungicide pass!

Ask your representative today how Monty's can help improve the quality of your crop and increase your ROI

Contact your Monty's representative, visit montysplantfood.com, or call 800.978.6342 for more information.

Monty's products to apply with your fungicides include:

Microhance®

- Contains six important nutrients including Nitrogen
- Offers a unique blend of Monty's technology designed to provide nutrients to the plant at any stage of growth

K28™ Liquid Potash

- A supplement for potassium-deficient plants
- pH balanced formula that can be applied 2x2 at planting and safely added to nitrogen solutions, and most herbicides and fungicides, for foliar application

Agri-Sweet™ FG

- Refined sugar that can be used for any application where you are currently using molasses or sugar

Surge XD™

- Contains Monty's proprietary humics and fulvics
- Designed to enhance nutrient uptake into the plant
