

MONTY'S PRODUCE PROGRAM

GIVE YOUR PRODUCE THE BEST PROGRAM FOR SUCCESS!

Monty's has developed a unique program specifically designed to maximize your produce yields this season. Monty's products...

- ✓ Can be foliar-applied, providing readily available plant nutrients.
- ✓ Include a 7-9-5 analysis with Sulfur, Iron and Zinc.
- ✓ Provide energy for the plant and a food source for microbes. Plus, with Agri-N you get 14% Nitrogen.
- ✓ Promote root development for sustainability and plant growth.
- ✓ Reduce compaction, while promoting root development and moisture retention.
- ✓ Promote conversion of organic matter, releasing nutrients to your field.
- ✓ Can be applied with most herbicides.*

Talk to your Monty's representative today about how our Produce Program can help you be more successful this season and next. Monty's ... Healthier soils. Healthier crops. Higher ROI!

**TARGET PROBLEMS TODAY WITH
MONTY'S PROVEN NUTRIENT SOLUTIONS**

"Monty's is so easy to use since it mixes with several products. I have done several field trials and have made Monty's one of my staple products, especially now!"

Scott Saxberg, Farmer

MONTY'S PRODUCE PROGRAM

MONTY'S 3-PRODUCT PROGRAM: Apply before seeding, planting, or transplanting. Monty's Produce Program can be applied broadcast, in-furrow, in transplant solution, or foliar through drip lines or irrigation. Combining Monty's 3 products provides a vital synergy to the soil, the roots, and the microbes to nourish the growing produce for a maximum path to high production, while also providing tremendous root development, seeding stamina, and vigor for yield potential.

TIMING OF APPLICATIONS: Monty's 3-product program can be applied any time throughout the season to maximize the crop's full potential. When addressing nutrient deficiencies, Monty's recommends K28 Liquid Potash, Sulfur 15, and/or Microhance in short timing through foliar spraying.

Can be applied with most pesticides, fungicides, herbicides, or fertilizer applications.*

-  **C795 Plus** - A concentrated, versatile liquid plant food with NPK and other essential nutrients.
-  **Monty's Liquid Carbon (MLC)** - Contains Monty's proprietary activated humic technology. It is a soil conditioner designed to reduce soil compaction and improve overall soil health. MLC provides a catalyst for release and conversion of soil nutrients.
-  **Agri-Sweet FG/Agri-N (sugar plus 14% nitrogen)** - A highly refined carbohydrate that is a food source for the soil biology, increasing their numbers and activity which promotes the exchange of sugars, enzymes, and hormones with the plant root system.

C795 Plus

Directions for use

- For use on all produce, foliar apply anytime from early spring through fall. Suggested application rate is 2 quarts per acre.
- Best if used with other Monty's products including starters, foliars, micronutrients, and biologicals.
- Before winter, Treat your soil for next season with 2 quarts of MLC and Agri-Sweet FG.

Monty's Liquid Carbon (MLC)

Directions for use

- For general soil preparation, apply 2 quarts per acre directly to soil in fall and early spring. May also be applied at the same rate at pre-plant, planting, or for residue management. Apply 2 quarts per acre when foliar applying with liquid nitrogen or other fertility products.
- Best if used with other Monty's products including starters, foliars, micronutrients, and biologicals.

Agri-Sweet FG/Agri-N

Directions for use

- Soil applied at 2 quarts per acre for microbial stimulation.
- Best if used with other Monty's products including starters, foliars, micronutrients, and biologicals. Ask your representative about specialized programs.
- See label for more detailed information.

COST OF PRODUCE PROGRAM

COST OF 3 COMBINED PRODUCTS AS A PRODUCE PROGRAM†:

275 gal Totes: \$28.24 / 30 gal Drums: \$30.52 / 2.5 gal Jugs: \$33.20

Cost is per application, based on 2 qts/ac each of the 3 products.

To enhance yield goals or if additional nutrients are required (based on soil and/or tissue samples), add K28 Liquid Potash, Sulfur 15, or Microhance (micronutrient package) – each at 2 qts/ac.

Monty's Programs' product and application rate recommendations are intended to serve as a base to achieving your yield goals. We recommend that soil tests be done prior to planting new crops. In subsequent years, you should take soil tests, along with petiole samples, to determine nutrient levels. Additional products, product substitutions, and/or adjustments to application rates may be necessary based on soil test results, weather conditions, and insect/disease pressure for nutrient and stress management. Consult your Monty's representative for guidance.

For more information, contact your Monty's representative, visit montysplantfood.com, or call 800.978.6342

Please check your state and local laws to determine whether restrictions on the use of phosphorus fertilizers apply to your operation.

† Prices are subject to change contingent on the market. Please consult your Monty's representative for current pricing.

* For compatibility or specific application information, please refer to product label.
