

5-20-9 WITH SULFUR AND ZINC

5-20-9

GUARANTEED ANALYSIS

Total Nitrogen (N)	5%
5% Ammoniacal Nitrogen (N)	
Available Phosphate (P ₂ O ₅)	20%
Soluble Potash (K ₂ O)	9%
Sulfur (S)	1%
1% Combined Sulfur (S)	
Zinc (Zn)	0.05%
0.05% Chelated Zinc (Zn)	

Derived from Ammonium Thiosulfate, Phosphoric Acid, Potassium Acetate, and Zinc EDTA

PRODUCT DESCRIPTION

Monty's 5-20-9 is intended to be used as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients required by crops and other plants.

DIRECTIONS FOR USE

Monty's 5-20-9 may be applied in water, other liquid fertilizers and suspensions, or with most pesticides. Application rates and dilution factors depend on crop sensitivity, the amount of foliage to be sprayed, and the application method. Monty's recommends first taking a soil test or plant tissue test, and having a qualified lab analyze the samples to determine nutrient levels in your soil or plant, then follow recommended applications.

Application guidelines for one growing season in the absence of a soil test or plant tissue test: Dilute 2-3 gallons per acre and apply in furrow on the seed, or 2x2. May also be foliar applied.

5-20-9 should not be mixed with liquid nitrogen.

Net Contents - 275 US Gal (1,040.98 Liters)
