### PRODUCT DESCRIPTION

Monty's 6-18-6 with Sulfur and Zinc is intended to be used as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients required by crops and other plants.

### DIRECTIONS FOR USE

Monty's 6-18-6 with Sulfur and Zinc may be applied in water, other liquid fertilizers and suspensions, or with most pesticides. Application rates and dilution factors depend on crop sensitivity, the amount of foliage to be sprayed, and the application method. Monty's recommends first taking a soil test or plant tissue test, and having a qualified lab analyze the samples to determine nutrient levels in your soil or plant, then follow recommended applications.

Application guidelines for one growing season in the absence of a soil test or plant tissue test: Dilute 1-2 gallons in a minimum of 10 gallons of water per acre. May apply in furrow, 2x2, or foliar.
