

PRODUCT TECH SHEET

SULFUR 15

Product Description

Monty's Sulfur 15 is a 8-0-0. Sulfur activates the enzyme and hormone systems for plant growth. Sulfur 15 is easy to mix, simple to use, and readily available. Consider the advantages of adding sulfur.

Application Benefits

- Helps develop enzymes and vitamins in plant
- Promotes nodulation for nitrogen fixation by legumes
- Aids in seed production
- Is necessary in chlorophyll formation
- Is present in several organic compounds
- Sulfur and Nitrogen are both constituents of proteins and are associated with chlorophyll formation

Active Ingredients

Total Nitrogen (N)8%

2% Ammoniacal Nitrogen (N)

Sulfur (S)15%

15% Combined Sulfur (S)

Derived from Ammonium Thiosulfate

For Tobacco Use: Chlorine (Cl) Maximum 0.02%

Directions For Use

GENERAL: Mix in a minimum 10 gallons of water per acre when applying.

Corn: Early vegetative stage—1-2 quarts per acre

Cotton: 4-5 node stage or 1st or 2nd glyphosate application
—1 quart per acre; 9th node or after—1 quart per acre

Rice: Flag leaf—1 quart per acre

Soybeans: 3rd to 4th trifoliate—1 quart per acre;

Early pod set—1 quart per acre

Wheat: Dormancy break—1 quart per acre

HIGH YIELD: Apply in-furrow, 2x2, or Y-drop at a rate of 1-2 gallons per acre. Monty's high yield program can vary for crops, application rates and timing. If you are interested in a high yield program, contact your Monty's representative.

Physical and Chemical Properties

pH: 6.6-7.5 | Water solubility: 100%

Specific gravity (H₂O=1): 1.22

Boiling Point: >212° F | Freezing Point: 32° F

Monty's products are recommended as supplements to your current farming practices and are not recommended to replace the nutrients typically added to the soil. We suggest taking a soil and/or tissue test, have a qualified independent lab analyze the samples to determine nutrient levels in your soils and plants, and then follow the recommendations of a qualified CCA, agronomist or dealer.

When tank mixing any Monty's product with other farm chemicals, always read and follow the label directions of the chemical(s) you are considering and administer a jar test and/or a strip test before adding Monty's to your tank mix. When mixing with other farm chemicals, tank mix Monty's only after diluting the chemical according to label directions. Knowing the chemical's "mode of action" (block photosynthesis) or metal content (copper based) will help determine the compatibility of Monty's.

FOR COMMERCIAL USE ONLY. KEEP OUT OF REACH OF CHILDREN. HARMFUL IF SWALLOWED. AVOID CONTACT WITH SKIN, EYES, OR CLOTHING.

Information regarding the contents and levels of metals in this product is available on the Internet at: <http://www.aapfco.org/metals.html>
