Product Description

Turf Power SRN includes slow-release nitrogen and other important nutrients - not typically found in conventional fertilizers...plus Monty's activated humics!

Application Benefits

- Apply to any plant, at any stage of growth
- Can be used on all varieties of cool, transitional, and warm season turf in all growth phases
- · Provides extended plant nutrition for controlled growth
- Slow release allows more balanced long-term benefits
- Industry-leading activated humic technology

Active Ingredients

Total Nitrogen (N)
6.5% Ammoniacal Nitrogen (Ammonium Hydroxide)
6.5% Urea Nitrogen
Available Phosphate (P2O5) (Phosphoric Acid)2%
Soluble Potash (K2O) (Potassium Hydroxide)6%
Sulfur (S) (Ammonium Thiosulfate)
1% Combined Sulfur
Iron (Fe) (EDTA)
.15% Chelated Iron
Manganese (Mn) 0.25%
.25% Chelated Manganese
Zinc (Zn) (EDTA0.1%
.1% Chelated Zinc

Application Rates

Non-Plant Food Ingredients:

GENERAL: Turf Power SRN is compatible with most herbicides and pesticides but should be jar tested prior to mixing in the tank. Do not mix concentrated components together prior to mixing with the appropriate amount of water. For specific application information, contact your representative.

Humic Acids (derived from oxidized lignite)......0.75%

HIGH-YIELD: Monty's high-yield program can vary for crops, application rates and timing. If you are interested in a high-yield program, contact your Monty's representative.

Directions For Use

See label for more detailed information.

Physical and Chemical Properties

pH: 8.5-9.5 | Specific gravity (H₂0=1): 1.236

Monty's products are recommended as supplements to your current farming practices and are not recommended to replace the nutrients typically added to the soil. We suggest taking a soil and/or tissue test, have a qualified independent lab analyze the samples to determine nutrient levels in your soils and plants, and then follow the recommendations of a qualified CCA, agronomist or dealer.

When tank mixing any Monty's product with other farm chemicals, always read and follow the label directions of the chemical(s) you are considering and administer a jar test and/ or a strip test before adding Monty's to your tank mix. When mixing with other farm chemicals, tank mix Monty's only after diluting the chemical according to label directions. Knowing the chemical's "mode of action" (block photosynthesis) or metal content (copper based) will help determine the compatibility of Monty's.

FOR COMMERCIAL USE ONLY. KEEP OUT OF REACH OF CHILDREN. HARMFUL IF SWALLOWED. AVOID CONTACT WITH SKIN, EYES, OR CLOTHING.
