PRODUCT DESCRIPTION

Monty's Catalyzer soil conditioner is designed to aid in the breakdown of organic matter. It can improve moisture management in your soil. This product contains Monty's activated humics, which are processed using our proprietary technology. Humic acids may enhance micronutrient uptake.

DIRECTIONS FOR USE

Apply at varying rates depending on purpose or desired result. For general soil conditioning, apply 1 quart per acre mixed in a minimum 15 gallons of water directly to soil in fall and early spring. May also be applied at the same rate at pre-plant, planting, or for Residue Management. Apply 1 pint per acre when foliar applying with liquid nitrogen or other fertility products. Always conduct soil tests to determine nutrient levels and make needed amendments to assure good fertility levels in your soil. Monty's Catalyzer is a supplement to your fertilizer program.
