

MANAGE YOUR SOIL COMPACTION

Compaction is costing you yield! Monty's Liquid Carbon can help solve your soil compaction issues

> PROBLEM! Adverse wet or dry conditions, residue buildup, high salt levels, tied-up and imbalanced nutrients, and herbicide carry-over have left your soil compacted and unmanageable.

> SOLUTION! Monty's products can help reduce compaction and improve the overall quality of your soil.

Spraying Monty's Liquid Carbon at 2 quarts per acre can help reduce compaction issues!

See the difference when Monty's Liquid Carbon is applied.

“ Where we have had a problem with soil compaction and applied Monty's Liquid Carbon, we have seen a positive response in decreased soil compaction. It does work. I have seen it work. ”

Ron Perry, Agronomist. To see the complete interview, go to www.montysplantfood.com.

Monty's Liquid Carbon is a unique, activated humic technology designed to reduce compaction and improve overall soil health (including texture, structure, and helps break down plant residue. Also available in dry format!
