

MAXIMIZE YOUR LAST PASS THIS SEASON!

This is your last pass! Add Monty's to your herbicide, fungicide, or insecticide pass to boost your soybean yields this season!

Microhance is a deluxe micronutrient package which delivers readily available nutrients to the plant, helping maximize yield. Microhance is tank-mix flexible and includes Nitrogen, Sulfur, Boron, Iron, Manganese, and Zinc!

K28 Liquid Potash is a highly absorbable 28% liquid potash, which is exactly what the plant needs during this growth stage. K28 also helps address the stress the plant is dealing with at this time of the growing season.

Application: Tank-mix 1 quart of Microhance and 1 quart of K28 Liquid Potash with your herbicide, fungicide or insecticide. Contact your representative today for more information or call 7.800.978.6342
