

Maximize production with Monty's Hemp Pro products.

Use Hemp Pro Starter (and Monty's Liquid Carbon) at planting to establish your crop.

Use Hemp Pro Early Vegetative and Late Vegetative products during the growing season for vigorous, stress-resistant plants.

Hemp Pro Bloom & Flower is ideal to maximize flower production during the reproductive growth stage.

“

“I have recommended adding Monty's Liquid Carbon to starters for a while now. It really makes a difference. The hemp growers that have used Monty's products have all been very pleased with their results. It is a product line that I can suggest with confidence.” Tommy Thompson, TFC Field Sales Rep

Proven quality products for today's hemp professionals

Monty's products have been used by hemp growers across the country with great success. Monty's offers specific products to maximize hemp production. These are products you can utilize with confidence throughout the growing season – from pre-planting to harvest.

All of Monty's Hemp Pro™ products:

- ✱ Contain Monty's proprietary formulations
- ✱ Can be foliar applied or through drip irrigation
- ✱ Are low salt and pH balanced
- ✱ Are safe and easy to apply
- ✱ Will not burn and are non-corrosive.
- ✱ Are readily available for rapid plant response
- ✱ Can be applied with most herbicides, pesticides, and fungicides

Hemp Pro Active Ingredients

Hemp Pro – Starter 5-16-12

Total Nitrogen (N)5%
Available Phosphate (P ₂ O ₅)16%
Soluble Potash (K ₂ O)12%
Iron (Fe)0.30%
Zinc (Zn)0.05%

Hemp Pro – Early Vegetative 7-9-5

Total Nitrogen (N)7%
Available Phosphate (P ₂ O ₅)9%
Soluble Potash (K ₂ O)5%
Sulfur (S)4.5%
Iron (Fe)0.20%
Zinc (Zn)0.5%

Hemp Pro – Late Vegetative 10-8-4

Total Nitrogen (N)10%
Available Phosphate (P ₂ O ₅)8%
Soluble Potash (K ₂ O)4%
Sulfur (S)3%
Iron (Fe)0.45%
Zinc (Zn)0.4%

Hemp Pro – Bloom & Flower 3-15-16

Total Nitrogen (N)3%
Available Phosphate (P ₂ O ₅)15%
Soluble Potash (K ₂ O)16%
Iron (Fe)0.30%
Zinc (Zn)0.05%

Monty's Hemp Pro Products

Make Monty's products part of your complete fertility and crop management program.

Hemp Pro™ Starter (5-16-12) is ideal for quick emergence and early season vigor. It is a versatile liquid plant food that can be used at planting and as a foliar, enhancing plant development from germination to early vegetative.

Hemp Pro™ Early Vegetative (7-9-5) is a foliar applied liquid fertilizer containing N, P, K with Sulfur, Iron, and Zinc. It is specifically formulated to deliver readily available nutrients during the vegetative growth stages to enhance growth and root development.

Hemp Pro™ Late Vegetative (10-8-4) increases plant growth with our unique blend of NPK and micronutrients. Its balanced blend helps boost the hemp plant's ability to maximize nutrient uptake & plant development.

Hemp Pro™ Bloom & Flower (3-15-16) is for application during reproductive/bloom stages. It is specifically designed to maximize hemp plant performance during bloom stage.

For complete application instructions, refer to the Hemp Pro CBD Hemp Production Protocols, Hemp Pro product labels or contact your representative.

Available in 2.5, 30, 275 gallon – and bulk sizes. For more information on these and other Monty's products contact your Monty's sales representative, call 800.978.6342, or visit www.montysplantfood.com

Other Monty's products useful in hemp production:

Monty's® Liquid Carbon™ is an OMRI listed soil conditioner which reduces compaction and improves overall soil health. The proprietary activated humic technology enhances micronutrient uptake and enhances moisture retention. Helps address low organic matter and low CEC. Also available in dry format!

MagmaHume® is a unique combination of Monty's proprietary activated humics and basalt minerals – a source of secondary and micro nutrients – designed to improve soil fertility and health. Apply with pre-plant fertility and mix with soil in the greenhouse.

Humihance® is a humic-based fertilizer coating that will quickly and efficiently provide the benefits of Monty's Liquid Carbon to the plant and soil. It is ideal for use when blending granular fertilizer, and is compatible with micronutrients and pre-treated fertilizers.

Nauxin® contains seven important nutrients including Nitrogen and Potash. It offers a unique blend of Monty's technology designed to provide nutrients to the plant at any stage of growth, helping maximize the plant's yield potential.

Agri-N™ is a 14% Nitrogen and 26% sugar source. It is a natural product that provides nitrogen for green-up... and energy. It can reduce plant stress and help enhance growth.

Agri-Sweet™ is refined sugar. It is an excellent food source for soil microbes and helps enhance the release of soil nutrients through microbial activity.

K28™ Liquid Potash is a 28% potassium supplement for hemp plants. It is nearly pH balanced and can be safely added to nitrogen solutions, and most herbicides and fungicides, for foliar application.
